

BadgerNT ReportSCHEDULER now available in Rentsoft™

Basingstoke, Hampshire, September 2009 - The Business Software Centre (TBSC) has signed an agreement with service desk software publisher BadgerNT Limited, to make its ReportSCHEDULER product available in the Rentsoft™ service.

ReportSCHEDULER, a component of BadgerNT's market-leading HelpLINE application and available separately as a standalone product, enables users to automate the production of routine Crystal reports. Reports can be scheduled to run at specified times or intervals with output generated in a variety of formats and sent to print, email or file.

The ReportSCHEDULER application has been converted into a service using TBSC's protection technology - TBSC Rental Bridge™ - and will be downloaded to subscribers via the Rentsoft™ service. Subscriptions include free usage for the first month and are priced at £34.50 per month thereafter.

BadgerNT have a branded Rentsoft™ website which will be promoted to customers via their scheduling solutions website - www.activityscheduler.co.uk - and other marketing activities.

Jennie Tomlinson, Business Development Director of BadgerNT explains: "Making ReportSCHEDULER available on a subscription basis via the Rentsoft™ service will enable companies both large and small to use a powerful management tool and benefit from a reduction in costs and increased productivity."

Phil Hames Managing Director of TBSC added: "We are delighted to welcome BadgerNT as a Rentsoft™ software partner. ReportSCHEDULER is proven to increase productivity and reduce costs and that makes it a great addition to the Rentsoft™ service."

ENDS

About The Business Software Centre

TBSC has developed a unique technology and an e-commerce service to enable the distribution of application software on a subscription basis. The service makes it possible for end users to use Web, Windows and Virtualised software applications on a rental basis. The technology ensures that they will only be able to use them for as long as they continue to pay. Rentsoft™ represents an exciting new software distribution platform and with a choice of managed services enables ISVs to deploy their software as a service and develop a SaaS business model.
