

Hosted SharePoint® now available in Rentsoft™

Basingstoke, Hampshire, July 2009 - The Business Software Centre (TBSC) has signed an agreement with Digilink Limited, to make its Hosted Microsoft® Windows® SharePoint® Services solution available in the Rentsoft™ service.

Subscribers will benefit from an instant intranet, document management and storage solution with practical payment terms and no additional hardware or software costs.

Used by more than 100 million people worldwide, Microsoft SharePoint® gives individuals and teams access to the information they need when they need it. A Hosted SharePoint® solution enables Microsoft SharePoint® to be used on a subscription basis with no additional costs.

Digi-Link's Hosted SharePoint® solution provides a pre-configured secure online area to manage, share and save company documents. It also includes, at no extra charge, Digi-Link Revelation™, the best-selling add-on for Microsoft SharePoint® which enables offline file synchronisation and makes Microsoft SharePoint even easier to use.

Subscriptions for Digi-Link Hosted SharePoint® with Digi-Link Revelation™ are available in a dedicated Digi-Link Rentsoft™ service; and in a number of other Rentsoft™ services including Pipex and Pitney Bowes.

Subscriptions for Digi-Link Hosted SharePoint® with Digi-Link Revelation™ are available for up to 5 hosted users and up to 50 hosted users. The 5 user subscription includes 2GB of storage and the 50 user includes 10GB of storage. Subscriptions include free usage for the first month and prices start at just £7.99 per month thereafter.

Phil Hames, Managing Director of TBSC said: "The purchase cost of software applications can often preclude small and medium-sized business. The Rentsoft™ service makes the rental of software a real alternative to purchasing outright or worse, going without. We are delighted to have Digilink as a software partner. Its Hosted SharePoint® solution offers real benefits to small business customers and will enhance the Rentsoft™ proposition."

ENDS

About Rentsoft™

Operated by The Business Software Centre, the Rentsoft™ service makes it possible to use full versions of well-known business software applications on a subscription basis. Products include AVG Internet Security, Mamut Accounting and Ability Office Business. Prices include technical support and upgrades, and most subscriptions include a free trial period.
