

PC Paramedics enters the software rental market with Rentsoft™

Basingstoke, Hampshire, August 2009 - The Business Software Centre (TBSC) has signed an agreement with IT services provider, PC Paramedics Limited to provide a software rental service for its SME customers.

The service, powered by Rentsoft®, enables PC Paramedics' customers to request, download and rent a selection of business software applications via a branded website.

The applications, which include AVG Internet Security, Hosted SharePoint®, Mamut Accounting and Ability Office Business are offered on a 'pay-as-you-go' basis and many include free trial periods. Technical support, updates and upgrades are all included in the rental price.

Stephen Ling, Founder of PC Paramedics commented "We understand the pressures faced by growing businesses and are committed to offering our customers value for money. Providing our customers with a way to rent software and services rather than buy outright offers real financial benefits."

Phil Hames Managing Director of TBSC added: "Balancing the need to use business automation tools with day-to-day cash flow issues can be a challenge, which sometimes results in compromise. A Rentsoft™ subscription for business software offers a solution on both sides - high-value software, practical rental terms."

ENDS

About Rentsoft™

Operated by The Business Software Centre, the Rentsoft™ service makes it possible to use full versions of well-known business software applications on a subscription basis. Products include AVG Internet Security, Mamut Accounting and Ability Office Business. Prices include technical support and upgrades, and most subscriptions include a free trial period.
